

OPHTHALMOLOGY CLINICAL PROJECT EXPERIENCE

Medical Devices

A clinical comparison of an Er:Yag laser to phacoemulsification for extraction of cataract (product registration)	Medical writing Clinical study management Data management - Biostatistics
A multi-center, open-label, 1-week study to evaluate the consumer acceptance of two prototypes of a new dispenser in patients with glaucoma	Medical writing Clinical study management Data management - Biostatistics
Prospective, multi-center studies to evaluate the safety and effectiveness of foldable intraocular lenses in patients undergoing cataract extraction (product registration)	Clinical study management Data management - Biostatistics
Clinical investigation of a collagen glaucoma drainage device (product registration)	Clinical study management
Clinical investigations of pediatric, low myopia and anterior chamber IOLs (product registration)	Data management - Biostatistics Medical writing
Studies of an excimer laser system for use in PRK and LASIK treatments of myopia and hyperopia (product registration)	Clinical study management Data management
Study of glaucoma shunt (product registration)	Clinical study management Data management
Studies of use of refractive data from a wavefront measurement device for correction of PRK and LASIK refractive error (product registration)	Clinical study management Data management
Studies of an implantable contact lens for treatment of myopia and hyperopia (product registration)	Clinical study management Research compliance
Studies of laser thermal keratoplasty for correction of hyperopia (product registration)	Clinical study management Data management Research compliance
Study of a retinal tamponnade product	Data management
Study of a toric intraocular lens (product registration)	Research compliance
A trial of scleral expansion bands for treatment of presbyopia (product registration) Clinical study management	Data management
Evaluation of safety and efficacy of a phakic refractive lens for treatment of myopia and hyperopia (product registration)	Research compliance
Evaluations of a phacoemulsification system software upgrade to assess impact on corneal clarity and surgeon technique	Medical writing Clinical study management Data management - Biostatistics

Medical Devices continued

Economic comparison of currently marketed keratomes	Medical writing Clinical study management Data management
Evaluations of currently marketed refractive lasers to assess differences in contrast sensitivity	Clinical study management Data management
Studies of the efficacy of membrane differential filtration in treatment of patients with non-exudative ARMD (product registration)	Clinical study management Data management
Results of surgical removal of malignant eyelid tumors with frozen section controlled excision	Medical writing Data management - Biostatistics
Study of a new material soft contact lens for use in patients with moderate to severe dry eyes (product registration)	Clinical study management

Pharmaceutical Products

Ph I study to evaluate safety, tolerability and clinical effect of a compound used after PRK for mild to moderate myopia	Data management – Biostatistics Medical writing
Ph I study to assess safety and tolerability of an ophthalmic emulsion for treatment of DME	Regulatory affairs Clinical study management Data management – Biostatistics Medical writing
Ph I/II study to evaluate safety and tolerability of an intravitreal implant for treatment of DME	Clinical study management Data management Medical writing
Ph II trial to assess safety and efficacy of a posterior segment drug delivery system for treatment of persistent macular edema	Clinical study management
Ph II safety and efficacy assessment of an intravitreal injection to prevent recurrence of PVR	Clinical study management Data management - Biostatistics Medical writing
Ph II investigation of an injectable solution for acceleration of clearance of intra-vitreous hemorrhage	Clinical study management Data management- Biostatistics Medical writing
Ph II study of ocular tolerance of eye drops in patients with bilateral mild to moderate dry eye syndrome	Data management - Biostatistics
Ph IIIB multi-center study to compare efficacy and safety of an ophthalmic emulsion vs. a masked artificial tear in patients with moderate to severe KCS	Medical writing Clinical study management Data management - Biostatistics
Ph IV studies of proprietary eye drops in the treatment of SAC	Medical writing Clinical study management Data management -Biostatistics
Ph IV study of restoration of corneal sensitivity and surface integrity in dry eye with a topical ophthalmic solution	Clinical study management
Ph IV trial of the safety and efficacy of an ophthalmic solution for treatment of posterior lid margin blepharitis with or without rosacea or KCS	Medical writing Clinical study management Data management- Biostatistics
